SUMMARY

Senior frontend engineer with 7 years building **React and TypeScript web apps that make complex data usable**, from technical design through rollout and on-call. At Indeed I owned the post-apply experience for a **site serving 680M+ job seekers**, tech-led a **shared component library adopted by 5 teams**, and built a **streaming (SSE) layer** behind an LLM agent; at IBM I built APIs for a **video-streaming launch**. On my own time I built **Glassgrid**, linked charts and a canvas grid over **10M rows at 60 fps**, and added a **live Bay Area flight map** to it. I started on real-time logistics apps at J.B. Hunt and want to build interfaces that make flying safer.

EXPERIENCE

Senior Software Engineer · Indeed | San Francisco, CA — Dec 2024 – Jun 2026
Software Engineer II — *Aug 2022 – Dec 2024*

- Owned the responsive **post-apply flow** (React, TypeScript, **Redux state management**) on a site serving **680M+ job seekers**, end to end: technical design, **web performance**, accessibility and rollout. Partnered with Product, UX Design, Analytics and backend engineers to turn ambiguous goals into scoped milestones; shipped **A/B tests behind feature flags** and **cut Time to Interactive 15%**.
- Co-authored the **RFC** for the **shared React/TypeScript component library** behind **OneHost, Indeed's micro-frontend platform**; designed its component APIs with Design, then **led 6 engineers as tech lead** through design tokens, **Storybook docs** and CI/CD to production. **20+ reusable components adopted by 5 product teams; mentored ~12 engineers through code review (3 promoted)**.
- Partnered with backend and platform teams to build the integration layer that lets an LLM agent in Slack call internal platform APIs over MCP with **streamed responses over SSE** (Java, Spring WebFlux), **re-authorizing every call against user entitlements**; **cleared security review for applicant PII**.
- Set the team's quality bar: gated **Jest, Vitest, React Testing Library and Cypress** suites in CI, wrote **runbooks and docs**, built **Datadog RUM monitors and SLO alerts**, and shared **on-call**.
- Helped the team ship faster by rolling out **Claude Code and Codex** with a review-first workflow (every generated change validated by per-PR tests), **cutting ticket-to-merged-PR time 10%**.

Software Engineer II · IBM | San Francisco, CA — Sep 2021 – Aug 2022
Software Engineer — *May 2019 – Sep 2021*

- **Led the React side of moving developer.ibm.com** off legacy PHP/Angular to Go and React; rebuilt the Webpack build to **cut the JS bundle from 6 MB to 300 KB**, with **2× faster builds and 29× faster hot reload**, reclaiming 20+ engineer-hours a week.
- Designed the GraphQL schema and PostgreSQL data model and built the **GolfTV Apollo GraphQL API (Node.js, AWS)** for a **sports video-streaming service's worldwide launch**, **cutting response time 30%** with CDN caching; built and documented the **Express video upload pipeline** for **IBM Watson Media**, IBM's video streaming platform.

Software Engineer Intern, Mobile Applications · J.B. Hunt Transport | Fayetteville, AR — Sep 2018 – Nov 2018

- Moved user experiences to **React Native** on cross-platform, **real-time logistics apps**; wrote **Jest** unit and **Appium** E2E tests.

PROJECTS

Glassgrid · kalebkougl-portfolio.vercel.app/glassgrid (live) · github.com/Kaleb-kougl/glassgrid · TypeScript · React · MapLibre · DuckDB-WASM

- **Live Bay Area flight map:** adsb.lol ADS-B data via a **cached, keep-alive proxy** into DuckDB-WASM, on **MapLibre (Mapbox GL–compatible)** with **dead-reckoned motion**; map and charts **cross-filter each other**; a scrubber replays a **1.46M-fix day**.
- **Linked, cross-filtering charts** and a **virtualized canvas grid** holding **16.7 ms p95 frames (60 fps) over 10M rows**; a **Web Worker** query engine whose pre-aggregated cubes cut engine p95 from **963 to 87 ms**. **1,300+ tests in CI on 3 OSes**.

Portfolio & JD fit checker · kalebkougl-portfolio.vercel.app · Next.js 16 · React Server Components · MCP · WebGPU

- Rate-limited **MCP API** feeding a chat UI, plus an opt-in **on-device LLM** with a deterministic fallback. CI gates **137 Playwright E2E tests** (axe, visual regression), **Safari, iPhone and Firefox runs**, **Core Web Vitals on a throttled phone** and a JS budget.

SKILLS

Frontend: TypeScript · JavaScript (ES6+) · React 19 · Next.js · React Server Components · HTML5 · CSS3 · responsive layout · cross-browser
State & Async Data: Redux · Immer · Zod · REST · GraphQL (Apollo) · SSE streaming · Web Workers · Apache Arrow · LRU caching · feature flags
Data Visualization: cross-filtering charts · MapLibre / Mapbox GL · geospatial (WGS-84) · Canvas 2D · WebGL · virtualization · DuckDB-WASM
Shared Components & Docs: component API design · Storybook · design tokens · micro-frontends · RFCs · runbooks · code review
Testing & Reliability: Jest · Vitest · React Testing Library · Playwright · Cypress · visual regression · axe · CI/CD · Datadog RUM · SLOs · on-call
Backend & AI: Node.js · Express · Java (Spring WebFlux) · Python (FastAPI) · Go · PostgreSQL · AWS · Docker · MCP · Claude Code · Codex

EDUCATION

B.S. Biological Sciences, University of Arkansas · Cum Laude, 3.9 GPA — 2017
2.5 years as an NSF/FDA-funded research assistant · published in Analytical Chemistry (ACS), 2019
Certificate, Full-Stack Web Development, Northwestern University · Node.js, JavaScript — 2019
